2D singular test : case 2.2 with const $\delta\varphi$

Legend:
- $\delta\varphi = 0.05\rho_0(\vec{x} \in \Omega^+)$
- $\delta\varphi = 0.05\rho_0(\vec{x} \in W^+)$
- slope = -2.20
- $\delta\varphi = 0.10\rho_0(\vec{x} \in \Omega^+)$
- $\delta\varphi = 0.10\rho_0(\vec{x} \in W^+)$
- slope = -1.25

Axis labels: $\log_{10}(N_{grid})$ (x-axis), $\log_{10}(E_2)$ (y-axis)
